

## Beings of Light and Self-realized humans

This is in response to [Madhvisai's query](#).

India has had many self-realized individuals who are well known through books and the work of their disciples. From Gautama Buddha to Lahiri Mahasaya to Baba Ji to mention some names, before Brahma Baba. The rest of the world, had self-realized individuals as well, although they may not been well known. The important aspect is that Beings of Light are working with many human beings at this time, for it is these individual's time to reach self-realization to participate in the change of human consciousness.

Brahma Baba had the experience with an entity who he called "piyush" while he was alive. Not much has been disclosed about "piyush."

Humans cannot contact beings of light. It is them who will contact a particular person through a specific way. Brahma Baba contacts particular individuals in the BK faith, according to the need of time. He does not contact every BK.

Many may believe to have a contact with beings of light, but they are actually contacting spirits who have a different agenda than helping someone to self-realize.

I'd like to quote the "Hua hu Ching" as this paragraph is very close to my experience.

**"Greed for enlightenment and immortality is no different than greed for material wealth.**

**It is self-centered and dualistic, and thus an obstacle to true attainment. Therefore these states are never achieved by those who covet them; rather, they are the reward of the virtuous.**

**If you wish to become a divine immortal angel, then restore the angelic qualities of your being through virtue and service. This is the only way to gain the attention of the immortals who teach the methods of energy enhancement and integration that are necessary to reach the divine realm.**

**These angelic teachers cannot be sought out; it is they who seek out the student.**

**When you succeed in connecting your energy with the divine realm through high awareness and the practice of indiscriminating virtue, the transmission of the ultimate subtle truths will follow. This is the path that all angels take to the divine realm."**

What a being of light teaches is not the absolute "truth," or the "only way; " but rather the method needed according to the people they are dealing with and according to time. That is why there has been many methods which followers of self-realized beings have made into religions, given themselves the title of "possessing the truth," or having "God" with them.

My experience is just my experience. Someone else may have their own experience. What is important is to be honest with ourselves. Self-realization is not taught to the masses. It is an individual journey with lots of changes, where the teacher (being of light) will cater towards the level of the student. Thus, the method taught to a particular student is not the "only method," or the "only truth," as followers of self-realized beings have determined through their own ego trips.
